

lbd

lbd是一个负载均衡检测器，目前版本为0.4，主要用于给指定的域检测是否负载均衡。其官方网站为<http://ge.mine.nu>

——Stefan Behte

一，帮助文档

lbd - 负载均衡检测器0.4 - 检查给定域是否使用负载均衡。

作者:Stefan Behte (<http://ge.mine.nu>)

概念验证!可能会给出假阳性结果。

用法:/usr/bin/lbd域[port] {https}

lbd - load balancing detector 0.4 - Checks if a given domain uses load-balancing.

Written by Stefan Behte (<http://ge.mine.nu>)

Proof-of-concept! Might give false positives.

usage: /usr/bin/lbd domain [port] {https}

二，命令实例

lbd domain 3389 woshicainiao.cn

对woshicainiao.cn通过3389端口进行检测是否负载均衡

```
→ #lbd domain 3389 woshicainiao.cn
```

```
lbd - load balancing detector 0.4 - Checks if a given domain uses load-balancing.  
    Written by Stefan Behte (http://ge.mine.nu)  
    Proof-of-concept! Might give false positives.
